Website : [Sujit_Manmode_Automation](#)

Automation Test Engineer with 4.5+ years of experience in Selenium WebDriver, WebdriverIO, TypeScript, Java, API Automation, Rest Assured, CI/CD, and Agile Testing. Proven track record of building scalable automation frameworks, reducing regression effort by 70%, and delivering quality solutions across Banking, Retail, E-Commerce, and Digital Media domains.

Technical Skills

Languages: TypeScript, Java, SQL, HTML, CSS

Automation Tools: WebdriverIO, Selenium WebDriver, TestNG, Cucumber (BDD), Maven, JMeter, Appium, Jira, Git, Linux, Ansible, TestRail

API & CI/CD: Rest Assured, Postman, Jenkins, Azure DevOps, SonarQube, AWS, Docker, GitHub Actions

Databases: MySQL, PostgreSQL, SQLite

Reports: Allure Reports, Extent Reports, TestNG/JUnit Reports

Testing Types: Functional Testing, Regression Testing, API Testing, Integration Testing, Cross-Browser Testing, Smoke Testing, Sanity Testing, Performance Testing, Mobile Testing

Framework: Hybrid, BDD, Page Object Model(POM), SDLC, STLC

Experience

MostEdge Services Private Limited

January 2026 - Present

Automation Developer (Analyst)

Hyderabad

- Designed, developed, and maintained 100+ automated test scripts using TypeScript, WebdriverIO, and Cucumber, reducing manual testing effort by 70%.
- Worked across 4+ product applications simultaneously, ensuring high-quality releases through Functional, Regression, Mobile, and API Testing.
- Developed and executed 80+ API automation test cases using Rest Assured and Postman, improving test coverage and reducing validation time by 60%.
- Integrated automation suites with Jenkins CI/CD pipelines and managed test execution using TestRail, improving release efficiency by 50%.
- Collaborated with cross-functional Agile teams to identify, track, and resolve 150+ defects using Jira, contributing to a significant reduction in production issues.

Krushni Store Enterprises

April 2024 - December 2025

Automation Developer (Analyst)

Amravati(M.H.)

- Designed, developed, and maintained 50+ automated test scripts for web platforms with Selenium, boosting efficiency by 80%.
- Implemented and enhanced hybrid automation frameworks, improving testing efficiency by 75% and increasing test coverage by 70%.
- Reduced manual data entry by 85% through the successful implementation of automated test suites.
- Performed cross-browser testing across 4 different browsers, ensuring 90% compatibility of the web applications across all platforms.

Cognizant Technology Solutions

December 2021 - March 2024

Quality Assurance Engineer (Programmer)

Pune(M.H.)

- Assisted in the development and maintenance of automation scripts under the guidance of senior developers.
- Automated key banking processes including data validations, user onboarding, and compliance checks.
- Built and optimized 50+ robust Selenium automation scripts, accelerating regression testing and reducing manual effort by 60%.
- Created and executed 150+ automated test cases, reducing system bugs by 70%.
- Collaborated with the QA team to identify and document bugs, contributing to a reduction in manual testing efforts by 75%.
- Continuously monitored and fine-tuned script performance for optimal efficiency and reliability.
- Documented automation processes and created detailed user guides, boosting team productivity and knowledge sharing.
- Collaborated with cross-functional teams, including developers, QA, and business analysts, to ensure alignment on project goals.
- Monitored the performance of automation scripts and reported issues to senior developers for further optimization.
- Worked closely with product managers, developers, and QA teams to understand requirements, define test strategies, and ensure the quality of the final product, resulting in a 80% reduction in post-release defects.

Projects

MostEdge TV - Automation Developer

January 2026 - Present

MostEdge TV is an Android TV-based digital advertising platform that displays advertisements, promotional deals, lottery tickets, and lottery winner dashboards to users in real time.

Roles and Responsibilities:

Designed and automated 40+ test scenarios for Android TV applications using WebdriverIO and TypeScript, performing Functional, Regression, UI, and API Testing to ensure seamless content delivery and reduce production defects by 65%.

Technology Used: TypeScript, WebdriverIO, Cucumber (BDD), Rest Assured, Postman, Jenkins, TestRail, Jira, Git, Android TV Testing

Demo Link : <https://github.com/sujit1997/KrushStore>

Banking and Finance Project - Quality Assurance Engineer

March 2022 - March 2024

Client: A global leader in financial services, offering comprehensive advisory solutions worldwide, including investment banking, private banking, and asset management.

Roles and Responsibility

Developed over 50 Test Scenarios, Test cases and Test data, which included functional testing & Regression testing using selenium, TestNG, and cucumber BDD.

Technology Used : Java, Manual Testing, Selenium, TestNG, Cucumber (BDD), Jenkins, Jira, GIT, Linux

Report : [Manual Document Link](#)

Demo Link : <https://github.com/sujit1997/Parabank>

YourMenu

January 2021- December 2021

This web platform features menus from over 75 restaurants in Amravati city. For easy access, each user table includes a barcode that allows users to view menus from various restaurants and cafes.

Roles and Responsibility

Design and developed over 100 visually appealing and responsive web applications pages for clients, ensuring seamless user experiences by incorporating best practices in web development and front-end technologies.

Collaborated effectively with cross-functional teams to achieve this.

Technology Used : HTML, CSS, JAVA, Manual Testing , Selenium, TestNG ,GIT, SQL, SonarQube .
